

# One-Touch™ Intuitive Kiln Control

Four-Key Control Redefines Simplicity • Perfect for Schools & Hobbyists

## One-Touch™ Intuitive Kiln Control

The One-Touch™ Intuitive Kiln Control was designed for busy school teachers, contemporary studios, and hobbyists. One touch and you are ready to fire the bisque and glaze programs. No programming is necessary, simple adjustments are easy, yet sophisticated programming is possible.

## Simplicity without Compromise

### 1) ONE-TOUCH

Press one of two buttons marked **BISQUE** and **GLAZE**.

- You will then see either **bISC** or **GLA**
- Press **ENTER** and the kiln fires a slow Cone 04 Bisque or a 06 Glaze.
- You can add a **DELAY** time to the program by pressing the **DOWN** arrow when you see **FIRE** and before you press **ENTER**
- Press the **REVIEW** button to review the program. You can do this when you see the **FIRE** display or while firing

### 2) SIMPLE:

It is easy to change simple parameters to customize your program. When the user presses **BISQUE** or **GLAZE** and then holds the button for 5 seconds then a series of options will appear:

- **CndL** Candle at a low temperature to dry out the work – expressed in hours and minutes
- **COnE** Choose the cone that the program fires to
- **HLd** Add a soak time at the end of the firing
- **COOL** Cool the kiln – Fast, Medium or Slow for special effects or thick work
- **HEAT** Speed of firing – Fast, Medium or Slow
- **rStr** Restore the original default settings
- The **UP** and **DOWN** button will allow adjustment of these values
- The internal program ramps are transparent to the user

### 3) ADVANCED:

Press **CUSTOM** and you have four regular Ramp/Soak programs open for custom programming. Each program has eight segments with a ramp, set point and hold for each segment.
